

For the location in **Novi Sad BIMEXPERTS d.o.o.** we are searching for:

Internship in Electrical Engineering department for Engineering Projects (ELT) in BIM methodology (Paid Internship)

Do new technologies like BIM and digital communication in multiple locations seem appealing to you? Are you interested in creating concepts for planning, preparing and implementing work with agile teams in a process-oriented way?

Your professional profile:

- University degree in engineering field with a Major in electrical engineering or final year education at Faculty of Technical sciences
- Basic knowledge of MS Office, Office 365
- Knowledge of AutoCAD, Revit, DIALux, Caneco, ETS6, or similar programs would be an advantage but not a requirement
- Conversational level of English language
- Motivation for a constant learning and personal development is very welcomed

Tasks:

- Participation in the development of integrated planning concepts - planning concepts after consultation with the client based on applicable standards
- Participation in the development of coordinated and usable schemes and floor plans based on manufacturer specific product data for the appropriate phase of the project and taking into account common international standards (ISO, EN, .)
- Further development and support for quality planning and implementation of new technologies in Building Automation.
- Participation in the development of 2D / 3D detailed plans based on the obtained concept
- Participation in the production of families for Revit according to the manufacturer's specification

- Possible collaboration with the software development team and engineers on various projects
- Proactive work on innovation and continuous improvement

What we offer you:

- Paid internship - one month
- Possibility of the fulltime employment after the internship period
- Interesting projects that use the latest technologies
- Ongoing opportunities for training and development, internal trainings and buddy program
- Cooperation with the internal software department and work on international projects
- Benefits package after the training period – Fit Pass, private health insurance, private pension fund
- Team building activities, business trips, spacious office in the city center and so on.

Contact:

If this position arouses your interest, we are waiting for your application with a CV, motivation letter, and availability information, via email to jobs@bimexperts.com with the reference "Internship - Electrical Engineer ".

Za lokaciju u Novom Sadu **BIMEXPERTS d.o.o.** tražimo:

Praksa u odeljenju elektrotehnike za inženjerske projekte (ELT) u BIM metodologiji (plaćena praksa)

Da li vam nove tehnologije poput BIM-a i digitalne komunikacije na više lokacija izgledaju privlačne? Da li ste zainteresovani za kreiranje koncepata za planiranje, pripremu i implementaciju rada sa agilnim timovima na procesno-orijentisan način?

Vaš profesionalni profil:

- Univerzitetska diploma inženjera sa diplomom elektrotehnike ili završna godina Fakulteta tehničkih nauka
- Osnovno poznavanje MS Office paketa, Office 365
- Poznavanje AutoCAD-a, Revit-a, Dialux-a, Caneco-a, ETS6 ili sličnih programa bi bila prednost, ali ne i uslov
- Konverzacijski nivo engleskog jezika
- Motivacija za stalno učenje i lični razvoj je vrlo dobrodošla

Zadaci:

- Učešće u izradi integrisanih planskih koncepata - koncepti planiranja nakon konsultacija sa klijentom na osnovu važećih standarda
- Učešće u izradi koordinisanih i upotrebljivih šema i tlocrta na osnovu podataka o proizvodu specifičnih proizvođača za odgovarajuću fazu projekta i uzimajući u obzir zajedničke međunarodne standarde (ISO, EN, .)
- Dalji razvoj i podrška za kvalitetno planiranje i implementaciju novih tehnologija u automatizaciji zgrada.
- Učešće u izradi 2D/3D detaljnih planova na osnovu dobijenih koncepata (modelovanje)
Učešće u izradi familija za Revit na osnovu specifikacije klijenta (modelovanje)
- Moguća saradnja sa timom za razvoj softvera i inženjerima na različitim projektima
- Proaktivan rad na inovacijama i stalnom poboljšanju

Šta Vam nudimo:

- Plaćena praksa za jedan mesec
- Mogućnost zaposlenja sa punim radnim vremenom nakon završene prakse i obuke
- Zanimljivi projekti koji koriste najnovije tehnologije
- Stalne mogućnosti za obuku i razvoj, interne obuke i "buddy" program
- Saradnja sa internim softverskim odeljenjem i rad na međunarodnim projektima
- Paket benefita nakon perioda obuke – Fit Pass, privatno zdravstveno osiguranje, privatni penzioni fond
- Team building aktivnosti, poslovna putovanja, prostrana kancelarija u centru grada i još mnogo toga
