Study Programme Accreditation - PhD Studies

DOCTORAL ACADEMIC STUDIES Scenic Des

Standard 00. Higher Education Institution Competence for the Implementation of PhD Studies

The Scene Design PhD Studies in Arts Programme (the Programme) is a logical continuance of the Master Academic Studies in Arts Programme in the same field of interest, held on the Department of Architecture and Urbanism, Novi Sad Faculty of Technical Sciences. Additionally, the aim, deliverables and structure of this Programme are fitting for the interest, needs and professional competencies of outgoing students from of other art master programmes in neighboring professions, from faculties in Serbia and the surrounding regions. Coincidentally, the Programme is intended for international students, as the course is also offered in English.

This three-year Programme was devised with the aim of enabling the students to develop their interests, skills and competencies, to broaden the scope of their general knowledge and to maximize their potential for artistic, professional, theoretical and research work. The Programme structure consists of three introductory theoretical-phenomenological research topics (scenic phenomena in contemporary art; Space in stage art; and Theoretical discourse in scene design), as well as consideration of technical-technological processes and principles of space realization, their articulation, equipping and practical use (Technologies in Scene Design; New Spaces and Technologies of Spectacle).

Studying of artistic practice of stage design as the basis of student work engagement, is organized in three key branches: Scene Design in Theatre, Non-theatre Spectacle Design and Scene Design as a Multimedia Art. Naturally, these areas overlap and complement each other, which makes the students' work an opportune place to develop them in unison. Special attention has been given to theory and critique of theatre/scene design; this professional branch is yet to show its full potential in our social and cultural context, which is to be provided in continuity in order to ascertain its value. As a particular field of artistic and theoretical research, the students are offered a profound and detailed insight into traditional and contemporary tendencies in the region of former SFRY in the domain of theatre/scene design and fine arts as well as architecture. Appropriate knowledge and understanding of these aspects is today an essential prerequisite for creative positioning of young aspiring artists in the region; observed from afar, the art of the 20th century on the territory of former Yugoslavia is a surely challenging and an inspiring topic of interest to foreign students.

University of Novi Sad Faculty of Technical Sciences, with the Department of Architecture and Urbanism as a direct actor have, after years of preparatory activities, officially established the Chair in Arts Applied to Architecture, Technique and Design and Centre for Scene Design, Architecture and Technology (SCen) –OISTAT Centre Serbia, with the aim of providing a high-quality PhD study programme (as well as programmes of Undergraduate and Master Academic Studies in Arts Programmes in the field of scene architecture, technique and design). SCEN has already realized a number of projects in the field of scene design (exhibitions, seminars, lectures, artistic projects and events, publications etc.), among which the top two are projects in the field of technological development dedicated to research of buildings for performing events in Serbia, which resulted in substantial and original databases uploaded to the Centre's official web site. Project "ScenTech" was awarded a grant under Tempus, an EU Funding Programme, rendering it important in the Centre's activities; in the following three years it is to become a creative platform for development of new educational programmes in the field of scene design.

Chair in Arts Applied to Architecture, Technique and Design is envisaged and structured to connect and join in work the lecturers of scene design with their former students. The Chair is presently comprised of 3 full and 3 associate professors, 3 assistant professors and 5 teaching assistants, whereas the Centre, in addition, hosts 3 research associates on scientific projects. Also, the Chair has 9 visiting professors from some of the most prominent educational institutions in Europe and America in this field: (Nottingham Trent University from Nottingham, Royal Welsh College from Cardiff, DAMU from Prague, Ljubljana and Naples University, as well as Columbia University and New Jersey University from New York). Apart from Chair members, the lectures will engage two professors emeriti, two full and two associate professors from Novi Sad and Belgrade Universities. All teachers and associates to be engaged in realization of this study programme have high national and international professional references in scene design, architecture and art as well as scientific disciplines dealing with arts. These teachers have had mentorship on 9 from 10 PhD theses and 40 out of 41 master theses in scene design done so far. Among them, they have created and developed all academic scene design study programmes in Serbia and the region.

Study Programme Accreditation - PhD Studies

Scenic Design

DOCTORAL ACADEMIC STUDIES

Programme Structure

The Scene Design PhD Studies in Arts Programme aims to ascertain an integral relation to thinking, design, production, promotion and realization of performing events in the widest sense of the word; primarily to mould future generations of teachers and lecturers whose practices in this field will ensure further development of study programmes relevant to this field. The Programme is interdisciplinary and aimed at a wide range of professionals – architecture, applied arts and design, performing arts (scenography, costimography, light and sound design, dramaturgy, directorship, acting, artistic production and management etc.), fine arts (painting, sculpting, multimedia etc.), technical-technological disciplines (construction, electrical engineering, mechanical engineering, mechatronics etc.), social and human sciences (general and art history, philosophy, sociology, psychology, philology etc.). The Programme is especially intended for artists, professionals and researchers that find scene design and performing space, as well as different aspects of conceptual, functional and technical-technological specifications of spectacle a primary area of interest i.e. who tackle the scenic and scenical phenomena in their professional and/or research endeavors.

Eligibility of candidates: A student is eligible to enroll The Scene Design PhD Studies in Arts Programme if he/she has previously concluded undergraduate and master studies on one of the appropriate study programmes on the University of Novi Sad Faculty of Technical Sciences, or other faculties in artistic, technical or social areas, in the country or abroad, and gained at least 300 ECTS credits, with an 8.00 average. All candidates are to take an entrance exam (Standard 7 provides further clarifications on this issue). Duration of studies is 3 years (6 semesters), during which the student must accumulate at 180 ECTS credits at least. The Programme Curriculum (described at length in Standard No 5 with related tables) was devised to provide students with essential competencies for further work on the highest professional level (artistic, theoretical and research).

The curriculum envisages:

- 9 mandatory, single semester courses, providing 64 ECTS credits to the student;
- 20 ECTS credits students may obtain by enrolling and passing a number of elective courses;
- 96 ECTS credits are earned through preparation, production and presentation of the PhD in Arts Thesis.

The Curriculum envisions a final product of the studies in the form of a PhD in Arts Thesis Project, comprised of a realized work of art and an accompanying theoretical argumentation, whose preparation, theoretical and artistic research, public realization and presentation bear 96 ECTS credits in total.

Upon completion of all Programme requirements, the student is awarded the title PhD in Arts – Scene Design.

Upon finalization of this study programme, the student will have gained the following general competencies broadened in relation to the undergraduate and master academic study programmes, as well as knowledge, experience and comprehension built on personal professional, artistic and theoretical-critical work and practical work in teaching:

- competence to think, conceptualize, design, develop, produce, promote, realize and exploit highly complex and sophisticated works of art in the field of scene design;
- competence to participate in joint artistic project and to coordinate and manage a team in thinking, design, development, production, promotion and realization of highly complex and sophisticated works of art from the field of scene design;
- research competencies, capability of theoretical and critical thought and of performing actions in the field of scene design;
- ability to participate in the educational process and study programmes of all levels in the field of scene design;
- competence to guide existing educational processes and programmes, as well as ability to create and participate in design and realization of new study programmes in the field of scene design.

Study Programme Accreditation - PhD Studies

Scenic Design

DOCTORAL ACADEMIC STUDIES

Standard 02. Programme Objectives

The Scene Design PhD Studies in Arts Programme provides a unique organic blend of arts, architecture, technical disciplines, human and social sciences, which creates a positive environment for enhancement of this field in following areas:

- contribution to articulation and development of artistic and professional approach to thinking, conceptualization, design, development, production, promotion, realization and exploitation of works in scene design, with prominent awareness of correlating effects between scene design, scene architecture and its technical and technological aspects;
- contribution to articulation an development of research and theoretical-critical approach to thinking, conceptualization, design, development, production, promotion, realization and exploitation of works in scene design;
- contribution to articulation and development of professional, artistic and scientific aspects of scene design in correlation with architecture and technology as a structural system of interrelated factors.

A PhD in Arts – Scene Design has the competences for broad and detailed artistic, professional, research, theoretical-critical and educational practice in the field of scene design; he/she possesses the highest degree of knowledge, ability and competence to act individually or in groups in design, production, use and presentation of performing spaces and performing events; he/she can successfully and creatively use the available technical systems to their fullest and to manage new technologies; he/she possesses absolute knowledge of the methods, activities and techniques of production, promotion and management of performing events.

Study Programme Accreditation - PhD Studies

Scenic Design

DOCTORAL ACADEMIC STUDIES

Standard 03. Programme Goals

The overall goal of this study programme is to provide students with a wider knowledge and unique expertise needed for theoretical, critical and pedagogical acting in all professional disciplines and interdisciplinary projects in the field of scene design. The Programme is dedicated to acquiring the highest academic competencies needed for:

- autonomous thinking, conceptualization, design, development, production, promotion, realization and exploiting of highly complex and sophisticated works of art in the field of scene design;
- participation in joint artistic project and coordination and management of a team in thinking, design, development, production, promotion and realization of highly complex and sophisticated works of art from the field of scene design;
- research, theoretical and critical thinking and acting in the field of scene design;
- participating in knowledge transfer (educational processes) of all levels in the field of scene design;
- guiding existing educational processes and programmes, as well as creating and participating in design and realization of new study programmes in the field of scene design.

One of the specific goals of the Programme, in line with standards established at the Faculty of Technical Sciences, in regard to education of professionals, is to develop awareness of the need for life-long learning and development of the society in general. One of goals is to actively face students with challenges and advantages of teamwork, an aspect crucially important for a profession in a field as multidisciplinary as scene design. In addition, students enhance their abilities to present and defend their ideas and concepts, in regard to professional and wider public, professional, local and national institutions, media, potential investors and partners in projects and other activities.

DOCTORAL ACADEMIC STUDIES

Graduates' Competencies

Graduate students on the Scene Design PhD Studies in Arts Programme are capable of solving a wide range of complex tasks and problems arising in their field of expertise, by using sophisticated creative, research, scientific and artistic methods and procedures. The students are also equipped to continue their personal development through individual artistic and research endeavors.

Upon finalization of the activities prescribed by this study programme, the student is equipped with a wide range of competencies stemming from the knowledge gained during undergraduate and master studies in the following domains:

- professional contribution to artistic and cultural surrounding through thinking, design, development, production, promotion, realization and exploitation of his/her own and group works of art in scene design;
- planning, conceptualization, organization, articulation and design of performing spaces;
- production, realization and promotion of performing events;
- solving of intricate problems and tasks in the field of scene design through the use of advanced scientific and artistic methods;
- competence in managing actions and processes in theoretical and critical thought and research in scene design;
- establishing and further enhancement of value systems and ethical norms of artistic, cultural and professional surrounding, as well as society in general.

Candidates are to gain the following subject specific competencies:

- original artistic, professional and theoretical contribution to the field of scene design;
- academic writing with the highest level of argumentation and articulation of artistic concepts;
- sovereign integration of theoretical assumptions and artistic practice;
- highest level of knowledge and competencies for individual and group artistic involvement in thinking, design and presentation of performing spaces and performing events;
- ability to participate in educational processes in the field of scene design;
- ability to create new educational programme in scene design, individually and in groups;
- competency to act in the field of artistic critique and theory of scene design
- active participation in development of artistic and curator practices, as well as theory and critique of scene design.

Standard 05. Curriculum

DOCTORAL ACADEMIC STUDIES

The Scene Design PhD Studies in Arts Programme Curriculum was designed in such a manner to provide the student with essential competencies for artistic, research, theoretical-critical and professional work.

The curriculum envisages:

- 9 mandatory, single semester courses, providing 64 ECTS credits to the student;
- 20 ECTS credits students may obtain by enrolling and passing a number of elective courses;
- 96 ECTS credits are earned through preparation, production and presentation of the PhD in Arts Thesis.

The Curriculum envisages the production of a PhD in Arts Thesis Project, comprised of a realized work of art and an accompanying theoretical argumentation, whose preparation, theoretical and artistic research, public realization and presentation bear 96 ECTS credits in total.

1. Educational goal:

The subject aims to introduce students architectural features of city and its scenic potential functions. City scene as various events social political turbulence. City as scene for monumental public events. City as scene for various art events. City as an everyday scene of economical events in change of architectural and urban concepts. City as a tourist offer or city as a place for attractive festivals. The role of architecture, urban elements and the potential for all this potential and possible developments. Various examples of cities and their architectural and urban potential in terms of various scenes events.

2. Educational outcomes (acquired knowledge):

Students will become familiar with the capabilities and resources of the city and its architecture provide and allow for different types of events, ranging from spontaneous aiming to revolutionize those who deliberate again aim to improve and enhance the international standing of cities in this competent world. From Revolution to a production, from protests to street musicians, from strikes to festival, from theater to conflict ... City itself has the potential for massive event, from destructive (conflicts fan groups) to creative and empowering. Analyzing and exploring all opportunities will provide students with a new understanding of city, its architecture and ways to improve it.

3. Course content/structure:

Analysis of urban elements and considering the potential for a variety of events.

Connecting multiple elements in the scene that the city would allow certain events. Research historical events in different urban structures and their influence on later changes in the city. City as festival in market conditions and self-sustaining. City as a potential artistic production and marketing related to that. The aim of affirmation, freshness events, the concept of exchange and sustainability. City and its architecture distinctive on the map of cultural events, fitting in the (multi) cultural development

exchange and sustainability. City and its architecture distinctive on the map of cultural events, fitting in the (multi) cultural developmen strategy of the EU. Methods and strategies to improve the potential of the city in relation to its objectives.

4. Teaching methods:

Frontal methods: discussion, group work, individual work, illustrative-demonstrative methods, analysis of materials via the Internet (elearning).

1. Educational goal:

Unlike courses that examine the development, construction and display space in architecture, this course will address a variety of thinking and perceiving the specific aspects of space that have appeared throughout history and that with some of its aspects are the limiting phenomena. Space in this course will be treated as an art DNK categories, and also as a platform for the experiment, transgression and writing different ideological meaning.

2. Educational outcomes (acquired knowledge):

The outcome of the course is to familiarize students with issues of border regions, and reflect on the whole space in a new way. Throughout the semester project is a key part of the course, students will have the opportunity to personal physical Researchers penetrate and understand the phenomenon of the border regions.

3. Course content/structure:

3. Course content/structure:

Elements of theoretical discourse. Terminology, modes of application, interpretation and meaning. Levels of perception: from universal philosophical idea to theoretical principle in scene design. Poetics of creation in scene design and art. Systematic study of theories, theorists and theoretic principles through the history of architecture until today (chronological, national, linguistic). The relation between scene design and other arts through common creative principles. Development, continuity and discontinuity of individual theoretical hypothesis. Literary and non-literary means for understanding scene design and art. Comparative analysis of interpreting theoretical texts in the time of their origin and with the historical distance. Redefining ideas according to certain theoretical hypothesis utilizing new linguistic, semantic and semiotic interpretations of those texts and new knowledge on historical, social and cultural context. Relationship between architectural presentations and value systems articulated in theoretical and literary texts. Interactivity and transformation of architectural experience and interpretations. Defining architectural thinking. Human body as a conceptual strength for many architectural ideas (realized or unrealized on the level of theoretical hypothesis).

4. Teaching methods:

1. Educational goal:

Aim of the course is that students acquire theoretical and concrete knowledge about use of technology in the function of scene design, ability to participate in teamwork on creating artwork in the field of scene design, and realization by using complex technological means.

2. Educational outcomes (acquired knowledge):

After finishing course student is expected to understand contemporary situation in the field of technology in scene design and knowledge of technical and art component of scenic technology. It is included that is necessary to built ability of participation in teamwork, as well as ability for creating and leading team. Student is expected to have built personal views, ability to present them, argument and problematize verbally, as well as ability for practical use of these knowledge in new or unknown environment.

3. Course content/structure:

Course is directed toward studying "classical" and "contemporary" technology in the field of scene design, which includes a wide range of different technical means subordinated to the same aims: expressive means of the spectacle on the stage, visibility, audibility, simplicity organization of scenic event, feasibility in given space. Special attention is given to criteria and principles in creating team, task assignment, establishing and quality control, as well as safety and security issues.

4. Teaching methods:

Lectures with demonstrations in given topics; Discussions in the lectures and workshops; Preparations of shorter exposures by students in the workshops; Writing a term work (setting a theme, collecting literature, analysis of the literature, conception of a structure, realization of the work, oral exposure of the work).

DOCTORAL ACADEMIC STUDIES

Table 5.2 Course specification

Course:			Architecture in Yugoslavia from 1918 – 1990						
Course id:	SDI31								
Number of ECTS:	8								
Teacher:		Selinkić f	elinkić R. Slobodan						
Course status:		Elective							
Number of active tead	ching classe	es (weekly	r)						
Lectures:	Practical	classes:	Other teaching types:	Study research work:	Other classes:				
4	0		0	2	2				
Precondition courses	•		None						

1. Educational goal:

The objective of the subject is to provide students with extensive information on the flows of ideas, projects and works by architects, town planners and artists executed on the territory of Yugoslavia from 1918-1990, and Serbia from 1990 to date. Emphasis is on research into the similarities and diversities between the employed practices in the context of the complex Yugoslav community during its existence and in the context of European practices.

2. Educational outcomes (acquired knowledge):

Employing the problem approach rather than the chronological method, the concepts, subjects, projects and works of architecture are located and synthesized within social, historical, philosophical, cultural and artistic contexts. Students are trained to observe the manmade environment surrounding them and to which they belong in its entirety, and adequately formulate their own observations, positions and knowledge through skills of persuasive, systematic and expressive, particularly verbal, analysis.

3. Course content/structure:

The subject deals with the architecture and town planning of Serbia and the territories entering the new community with the Kingdom of Serbia immediately before 1918. The period from 1918 is characterized by a new geo-political set-up of the Kingdom, which is reflected in the architecture and town planning up to 1941, the period from 1945, when a different political set-up of the state comes into being, until its break-up in 1990. From 1990, the development of architecture and town planning in followed in the Republic of Serbia with all the phenomena characterizing it.

Precondition courses	-		None					

1. Educational goal:

The course is organized so that in active dialogue with the students deals with the phenomena of modernity in Serbia and its region discussed in more details concerning the problem of selective treatment of works or parts of the works of individual authors, specific aspects separated from one or more movements which fall within the scope of formal - either of language or program - theoretical, conceptual, ideological or political disposition. Along with theoretical insights of the subject, it refers to specific examples of artistic practices that are relevant to the problems of the basic theme. The course is not intended as an interpretation of the genesis of the modern Serbian art, but as a discussion of its key, conceptual and formal - linguistic content, and the identification and adequate evaluation of regional specificity.

2. Educational outcomes (acquired knowledge):

Improving the ability of interpretation of theories, languages, activities and practice of modern art in Serbia. Capability of analyzing and reading images, the evaluation of expressive language interpretation and ideological content of the phenomenon of modernity.

20th Century Art, Fine Art of the second decade, Fine Art of the third decade, Fine Art of the fourth decade, Fine Art fifth decade, Fine Art of the sixth decade, Fine Art of the seventh decade, Fine Art of the eighth decade, Fine Art of the ninth decade.

4. Teaching methods:

Lectures: historiography and theoretical considerations with appropriate visual materials, Seminar Exercises: active participation of students, analysis of art phenomena and artworks.

1. Educational goal:

Development and improvement of the wide knowledge in the field of Scene Design based on analysis of literature – books, critical and theoretical texts, articles in different magazines and media, art works and manifestations, papers from the scientific and professional conferences, meetings and symposia, documentation on the Internet and all other available and approachable sources. The main goal of the course is to define the relevant and potential topic of the PhD project in arts, as well as establishment of the creative discourse related to the chosen topic.

2. Educational outcomes (acquired knowledge):

Defined area of the PhD project in arts, as well as defined topic of the project explained and based on theoretical and creative research. Defined field and framework of research, as well as methodology of future work and expected result introduced through project proposal, explanation and argumentation.

3. Course content/structure:

Defining of the wide and narrow area of zhe PhD in arts project. Defining of the main creative motivation, goals and expectation. Overwiew of relevant theoretical base and incomes. Defining of the theoretical and creative framework of the project. Establishement of the basic artistic concept. Developement of the project draft based on defined concept. Research on the potential cretaive means, media and techniques. Definining of the production plan, including technical, opreational and financial issues. Formation of the list of referent scientific and creative sources. Doctorability study of proposed project.

4. Teaching methods:

Individual research under the menthorship.

Precondition courses	-		None						

1. Educational goal:

Establishing a deeper knowledge of the practices of scene design in theater arts. Construction and development of the highest level of artistic ability and professional work in the field of scenography, including all the creative components from this field.

2. Educational outcomes (acquired knowledge):

The highest level of poetic understanding and practical knowledge of scenography, scene space and scene design in theater.

3. Course content/structure:

cene design and scenography. Scenography as a science. Scenography as a professional discipline. Scenography as scene art. Structure of the scene. Scene resources and creative processes. Scenography and scene space. Scenography and scene time. Scenography and scene movement. Scenography as an aspect of directing. Scenography as an aspect of acting. Scenography as an aspect of tragedy.

4. Teaching methods:

Lectures, exercises, group work, individual work, workshops, consultations, final exam.

Course:		New Spaces and New Technology of Spectacle - selected							
Course id:	SDI62		chapters						
Number of ECTS:	9		onaptero						
Teachers:		Crowley	wley D. Sean, Hannah J. Dorita, Selinkić R. Slobodan, Bošković S. Romana						
Course status:	tus: Elective								
Number of active tead	hing classe	es (weekly	′)						
Lectures:	Practical	classes:	Other teaching types:	Study research work:	Other classes:				
4	()	0	2	0				
Precondition courses			None						

1. Educational goal:

Aim of the course is to introduce students to discourse of spectacle in modern society, spaces in which occurs and technology which use, also to terms theatricalizing city and urbanization spectacle.

2. Educational outcomes (acquired knowledge):

After finishing course student is expected to understand relation between spectacle and space, also to know history and theory use of technology in the function of creating and realization spectacle. Student is expected to have built personal views, ability to present them, argument and problematize verbally.

3. Course content/structure:

Course is directed toward studying new spaces in which spectacle occurs and contemporary technology which uses. Correlation spectacle, space and technology is considered in ralation to ideological, political, aesthetic, cultural and social context. If we define spectacle as every event in the space, and not as every prepared in advance public event performed in real space and time, by scenic tools, the key issue become relation between event and space. This relation is considered on examples of scenic buildings - specially designed modern architectural objects, reconstructed theatre buildings, "non-theatre" spaces that are re-utilized (factories, warehouse, hall) and ambient, public spaces in the city. Technological means are analyzed from the artistic and technical aspect, considering logic, principles and procedures of use. Special area of studying represents spectacle of technology when technology by its forms, scales and capabilities become spectacle for itself.

4. Teaching methods:

Lectures with demonstrations in given topics; Discussions in the lectures and workshops; Preparations of shorter exposures by students in the workshops; Writing a term work (setting a theme, collecting literature, analysis of the literature, conception of a structure, realization of the work, oral exposure of the work).

Table 5.2 Course specification

Course:			Out-of-Theatre Performance Design						
Course id:	SDI52								
Number of ECTS:	9								
Teachers:		Pavić D.	Pavić D. Branko, Žižka P. Tomaš, Zeković V. Miljana						
Course status:		Elective							
Number of active tead	ching classe	es (weekly	′)						
Lectures:	Practical	classes:	Other teaching types:	Study research work:	Other classes:				
4	(0	0	2	4				
Precondition courses			None						

1. Educational goal:

Introduction to out-of-theatre performance. Understanding, anticipating, planning, realization and control of the spectacle in public space. Understanding and appliance of adequate scenic, architectural and technical-technological means in out-of-theatre performance realization. Development of creative and critical thinking in the field.

2. Educational outcomes (acquired knowledge):

Gaining knowledge from domain of phenomenology of out-of-theatre performance. Acquired ability for understanding, analyzing and comparing of performances and spectacles in urban and rural areas. Acquired ability for individual critical thinking and valorisation of state of play in the field of spectacle. Students' active practical engagement through recognition of individual or team work in domain of real and/or theoretical project realization.

3. Course content/structure:

Term and definitions of spectacle and society of spectacle, logic of spectacle occurrence; theatre and out-of-theatre performance - comparative analysis and evaluations; types and examples of out-of-theatre performances - motives and outcomes; in situ theatre; city's memory and theatre of memory; urban scene design - installations in urban space; ritual spectacle; spectacle of ceremony; celebration spectacle; festivals and parades; city-spectacle; World Fairs; fun spectacle; sport spectacle; typology of urban spectacle spaces; planning and control over political spectacle.

4. Teaching methods:

Lectures; exercises; team work; individual work; workshops; consultations; final exam.

Precondition courses None									

1. Educational goal:

The objective of the course is that students, through a review on contemporary artistic practice, be introduced to trends, developments and significant examples of contemporary art in the region. Familiarize with the tendencies in modern art should contribute to raising awareness about the importance of contemporary art practice and the interconnection of all forms of artistic activities.

2. Educational outcomes (acquired knowledge):

Creating awareness of the value and diversity of artistic production in the region in order to obtain an overall picture of the importance of contemporary art. Training skills on interpretation theory, language, action and practice of modern art in Serbia and the region.

3. Course content/structure:

Overview of the Contemporary World of Art (2) Overview of Contemporary Art in the region for decades and countries (10)

4. Teaching methods:

Lectures: historiography and theoretical considerations with adequate visual materials. Seminar exercise: active participation of students, the analysis of phenomena and artistic works.

Table 5.2 Course specification

Course:										
Course id:	A116A	(Jrban and regional	I dynamics and functional	principles					
Number of ECTS:	9									
Teachers:		Kostreš L	_j. Milica, Joubert Marc							
Course status:		Elective								
Number of active tead	hing classe	es (weekly	r)							
Lectures:	Practical	classes:	classes: Other teaching types: Study research work: Other classes:							
4	(0 0 2 3								
Precondition courses None										

1. Educational goal:

The course will feature contemporary theories and projects that involve non-linear dynamics, as the main driver of new structures and processes in the urban and regional context. Strong interactions between the system components in the physical, economic and political terms will be presented in order to understand cities and regions as dynamic systems in which the intensity, flow and movement of people, capital, goods, information and technologies dominate over the fixed hierarchies.

2. Educational outcomes (acquired knowledge):

Students will be trained to understand the dynamic components and mechanisms of functioning and structuring of the urban and regional systems. Such an analytical and critical framework is an important part in the process of understanding the complex relationships within the built environment.

3. Course content/structure:

Dynamic component in the global context; Philosophical base - "nomadic thinking"; Settlement networks and interactions at the regional level; Urban-rural connections and relationships; Existing forms of interaction in urban and regional context; Urban form as an indicator of interaction and activity; Functional base as a driver of urban processes; Everyday life in the cities - "cycle studies"

4. Teaching methods:

The method of critical analysis; illustrative-demonstrative methods, method of synthesis of acquired knowledge; Interaction between participants in the learning process

1. Educational goal:

Research and application of modern geometric approach to the space representation

2. Educational outcomes (acquired knowledge):

To develop innovation in the use of technological principles and methods that are related to the techniques of geometric space representation.

3. Course content/structure:

3D geometric models. Study of shape. Explicit, implicit and parametric approach to the spatial structure representation. Analysis of the of 3D models - elements, surfaces, solids (Swept, B-rep, CSG) and theirs characteristics. The implicit definition of shape using algorithms. The application of theoretical approaches to the geometric representation of form and space in the design, architecture and urbanism. Simulation, visualization, prediction and evaluation is based on a geometric representation of space. New concepts and strategies in the design based on a geometric space representation.

4. Teaching methods:

Lectures. Workshops, presentations, and discussions or mentoring. Oral exam.

Precondition courses 1. Educational goal:

Development and improvement of the wide knowledge in the field of Scene Design based on analysis of literature – books, critical and theoretical texts, articles in different magazines and media, art works and manifestations, papers from the scientific and professional conferences, meetings and symposia, documentation on the Internet and all other available and approachable sources. The main goal of the course is to define the relevant and potential topic of the PhD project in arts, as well as establishment of the creative discourse related to the chosen topic.

2. Educational outcomes (acquired knowledge):

Public performance (or exhibition etc) of the complex individual art work in the field of Scene Design, as well as public presentation and explanation in front of the examining board.

3. Course content/structure:

Production and public performance (or exhibition etc) of the PhD art work in front of the examining board. PhD project in arts is a complex, individually defined and produced work of art, performed or exhibited in public, as well as textual explanation of the art work. Art work, as a central and basic element of PhD project, needs to be complex, performed or exhibited in public (in the theatre, concert hall, gallery, museum, environmental space etc) as a mono or multi media work in the field of Scene Design (theatre performance, artistic event, installation, action or performance, site-specific project, exhibition etc). Textual explanation needs to be supported by all necessary graphic and media documents (photos, artistic and technical drawings, sketches, video and audio recordings etc), as well as lists of references regarding literature, web and other sources, and CV of the candidate. Textual explanation by content and form needs to be adequate to the Master of Science Thesis in theory or history of art.

4. Teaching methods:

Individual research under the mentorship.

Standard 06. Programme Quality, Contemporaneity and International Compliance

The Scene Design PhD Studies in Arts Programme is in line with all contemporary and relevant artistic and scientific currents in the corresponding field of expertise, and is comparable with other similar study programmes held on the international level on all HEIs, particularly in European educational context.

The Scene Design PhD Studies in Arts Study Programme integral and all-encompassing and provides the students with the latest artistic, scientific and professional knowledge and skills from the field relevant to the Programme.

The study programme is comparable to:

- 1. Cardiff School of Art & Design (Cardiff, UK) http://cardiff-school-of-art-and-design.org/researchdegrees/profdoc
- 2. Goldsmiths, University of London (London, UK) http://www.gold.ac.uk/pg/mphil-phd-art
- 3. Carnegie Mellon University (Pittsburgh, USA) http://www.cmu.edu/index.shtml
- 4. The School of Art and Design, University of Illinois (Champaign, USA) http://www.art.illinois.edu/content/graduate/programs/art-education-phd

The study programme is formally and structurally in compliance with the subject specific accreditation standards and with all European methodological standards in regard to enrollment, programme duration, study model and acquisition of the diploma.

DOCTORAL ACADEMIC STUDIES

Student Enrollment

A student is eligible to enroll The Scene Design PhD Studies in Arts Programme:

- if he/she has previously completed undergraduate and master academic studies on one of the appropriate study programmes on the University of Novi Sad Faculty of Technical Sciences, or other faculties in artistic, technical or social areas, in the country or abroad, and accumulated at least 300 ECTS credits, with an 8,00 average;
- undergraduate students that have completed their academic studies according to regulations prior to adoption of the Law on Higher Education may enroll PhD Studies in Arts under the same conditions as individuals who own a bachelor and a master's degrees, under the condition that the diploma is equivalent to at least 300 ECTS credits, and an average grade above 8.0 proof of which is to be submitted in a form of an official Credit Equivalency Confirmation.

In addition to an official application form for the Open Call for students, the candidates must enclose a letter of motivation, proof of a diploma and a portfolio of their previous artistic and professional work. The entrance exam consists of a written essay on a given topic and an interview with an appointed committee. The committee takes into consideration the results from the entrance exam, the candidate's motivation and the results of one's previous studies, professional, scientific-research and artistic work. Following this, the committee issues the final list of candidates admitted to the PhD Studies in Arts Programme.

Study Programme Accreditation - PhD Studies

Scenic Design

Standard 08. Student Evaluation and Progress

DOCTORAL ACADEMIC STUDIES

Final evaluation and grading in each of the courses on this Programme is based on continual monitoring of students' work and results throughout the semester and their final exam results. By successfully passing the final course examination a student is awarded a certain number of ECTS credits, prescribed by the study programme. Every individual course on the Programme bears a certain number of ECTS credits that a student obtains by successfully passing the final examination. The number of ECTS credits was established based on the students' workload for a particular course and formed by implementing a unique methodology of the Faculty of Technical Sciences applied to all study programmes.

The students' success rate in mastering a particular course is continually monitored throughout the academic year and is expressed in points. A maximal number of points a student may acquire on a course is 100. One acquires these points by actively engaging on lectures and practical work, by fulfilling the prescribed course requirements and by passing the final exam. The minimal number of points that a student must obtain during the course by fulfilling the course requirements is 30, the maximum 70. Each course from the PhD in Arts Study Programme has a clear and published method of points' allocation. The method of acquiring points during the course includes a number of points one obtains by actively engaging in lectures and practical work or by fulfilling the prescribed course requirements and passing the final exam.

The final grade is expressed with a mark between 5 (fail) and 10 (excellent). The final grade is based on the number of points a student has obtained by fulfilling the prescribed course requirements and by passing the final exam, in accordance with the quality of acquired knowledge and skills.

Preconditions for engaging a course and taking the course final examination are defined for each course in particular.

Standard 09.

Study Programme Accreditation - PhD Studies

DOCTORAL ACADEMIC STUDIES Teaching Staff

The Faculty has secured teaching staff with necessary professional, scientific and artistic qualifications for the realization of The Scene Design PhD Studies in Arts Programme. The number of lecturers is optimal for the needs of the Programme and depends on the number of courses to be realizes and the workload prescribed by those courses. The total number of teachers is sufficient to cover the number of hours prescribed by the Programme, so that the average workload of a lecturer is 180 hours annually (lectures, student contact hours, practical work etc.) i.e. 6 hours per week.

In order to ensure a higher quality of lectures and to widen the knowledge of students, the Programme has engaged a number of visiting lecturers from national and international universities. The number of teaching associates corresponds to the needs of the Programme. The total number of associates on the Programme is sufficient to cover the total number of teaching hours on the Programme; associates have an average workload of 300 hours annually i.e. 10 hours per week. A certain number of external associates is also engaged in realization of the lectures; their professional experience and competencies additionally contribute to the Programme quality. Scientific and professional qualification of the teaching staff correspond to their engagement on the Programme. Each lecturer has at 5 representative references from an artistic and/or professional field particularly relevant to the course specification he/she is engaged in. All information on lecturers and teaching associates (CVs, references, election to a work position) are accessible to the public.

DOCTORAL ACADEMIC STUDIES

Standard 10. Organizational and Material Resources

All human, spatial, technical, technological, library and other resources, appropriate for the realization of the study programme in question and the number of proposed students have been obtained. Study Programme courses are to be conducted in classrooms equipped and specialized for this type of lectures, modified to meet the educational standards for future practitioners, artists and theoreticians of scene architecture, technique and design. Each student is provided with a working space of minimum 5 m2. The lectures are to be held in amphitheatres, classrooms and specialized laboratories. The Department of Architecture and Urbanism specialized library has over 3000 book titles relevant for the realization of the Programme. All courses prescribed by the Programme are supported by appropriate literature and teaching aids that are available on time and in numbers needed for normal course of lectures. Essential IT support is secured. The Faculty hosts a library and a reading room and can provide each student with a seat in an amphitheatre, a classroom, a laboratory.

FACULTY OF TECHNICAL SCIENCES 21000 NOVI SAD, TRG DOSITEJA OBRADOVIĆA 6

Study Programme Accreditation - PhD Studies

DOCTORAL ACADEMIC STUDIES

Standard 11. Quality Control

A quality check of the Programme is to be performed on a regular basis and systematically through selfevaluation and an external quality check. We should emphasize the practice of end-of-semester poll offered to the students for several decades now. The quality check of the study programme is conducted as follows:

- student polls at the end of each course;
- student polls with graduated students on the graduation ceremony on the overall quality of the study programme and the logistical support. In addition the poll assesses the comfort during the study process (cleanliness and orderliness of the classrooms etc.);
- polls for the teaching staff and personnel on the quality of the study programme and the logistical support to the studies. This poll also evaluates the work of the Faculty Deanery, the student service, the library and other faculty support services. The poll also assessed comfort during the study process (cleanliness and orderliness of the classrooms etc.).

A special committee is appointed to manage the quality of the Programme; it gathers all relevant chairpersons participating the Programme's realization and a student from each studies group.
