Management in IT

E-commerce

The development of information and communication technologies (ICT) and the occurrence of the Internet and wireless devices, contributed to the emergence of the new society in which information and knowledge are the most important resource. As a result, there is a growing interest towards the adoption of novel technology in different fields.

The conference focus is to facilitate implementation of Internet and Information Technologies in all areas of human activities. The conference provides forum for discussion and exchange of experiences between people from government, state agencies, universities and research institutions and practitioners from industry.

## Key notes

Papers must be based on unpublished, mature and original work.

The review process will be double-blind peer review.

At least one author of each accepted paper is required to register for the Conference.

## FICT
